Cancer and Chemotherapy, Volume III: Antineoplastic Agents is a collection of articles that deals with the treatment of cancer using drugs. The collection describes the various drugs that are used, the therapeutic approaches being taken, and agents that are being developed. Part I is a general review of anti-cancer drugs as regards their action mechanisms, pharmacokinetics, pharmacology, known toxicities, and clinical utility. These drugs include alkylating agents such as mitomycin C and nitrosoureas; plant alkaloids such as maytansine; antibiotics such as anthracyclines; platinum-containing complexes; antimetabolites; and hormones. Part II examines the molecular pharmacology of some major drug classes, namely, bleomycin and anthracycline. The text also discusses the chemistry, mechanism, and any structure-activity relationships found in these drug classes. Part III discusses in detail the clinical pharmacology of some antitumor drugs, for example, cisplatin and nitrosoureas. The text includes the clinical applications, biochemistry, metabolism, and the use of mathematical models in interpreting or describing resulting data. The book is helpful for pharmacologists, molecular biologists, and scientists involved in cancer-research.

The most popular ebook you must read is Immunodiffusion Ebooks 2019. You can Free download it to your laptop with light steps. RENTSMART.COM in easy step and you can Free PDF it now.

Most popular website for free Books. Site is a high quality resource for free e-books books. Give books away. Get books you want. You have the option to browse by most popular titles, recent reviews, authors, titles, genres, languages and more. Open library is a volunteer effort to create and share e-books online. No registration or fee is required, and books are available in ePub, Kindle, HTML and simple text formats. Best sites for books in any format! You may download books from rentsmart.com.
